

RutgersDataPro User Manual

July 25, 2026

Welcome to RutgersDataPro! This software was developed at the RUCARES Severe Behavior Program to make tracking session data easier. When you open the program you should immediately be presented with the session prep page and a sidebar with some additional options.

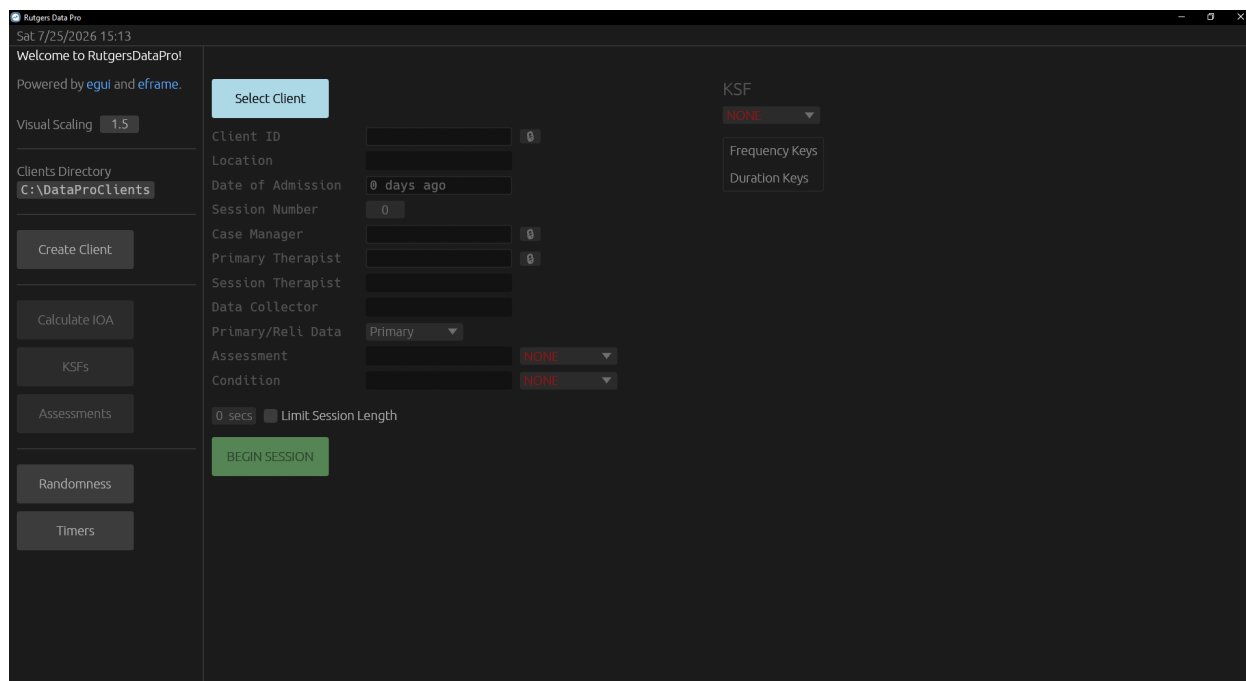

Figure 1: What you should see immediately after start up.

Begin by clicking on the blue Select Client button.

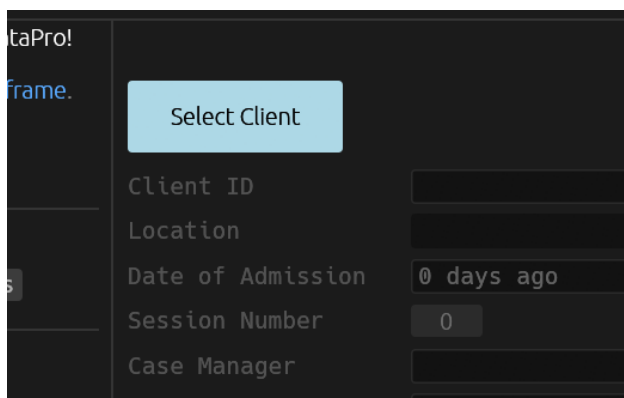

Figure 2: Select Client.

You will be prompted to look for a client folder that is stored in the DataProClients folder, which is usually in the C: folder.

Each client folder shares a name with the Client ID of the client.
