

RutgersDataPro User Manual

Alexander Fraebel

July 25, 2026

Welcome to RutgersDataPro! This software was developed at the RUCARES Severe Behavior Program to make tracking session data easier. When you open the program you should immediately be presented with the session prep page and a sidebar with some additional options.

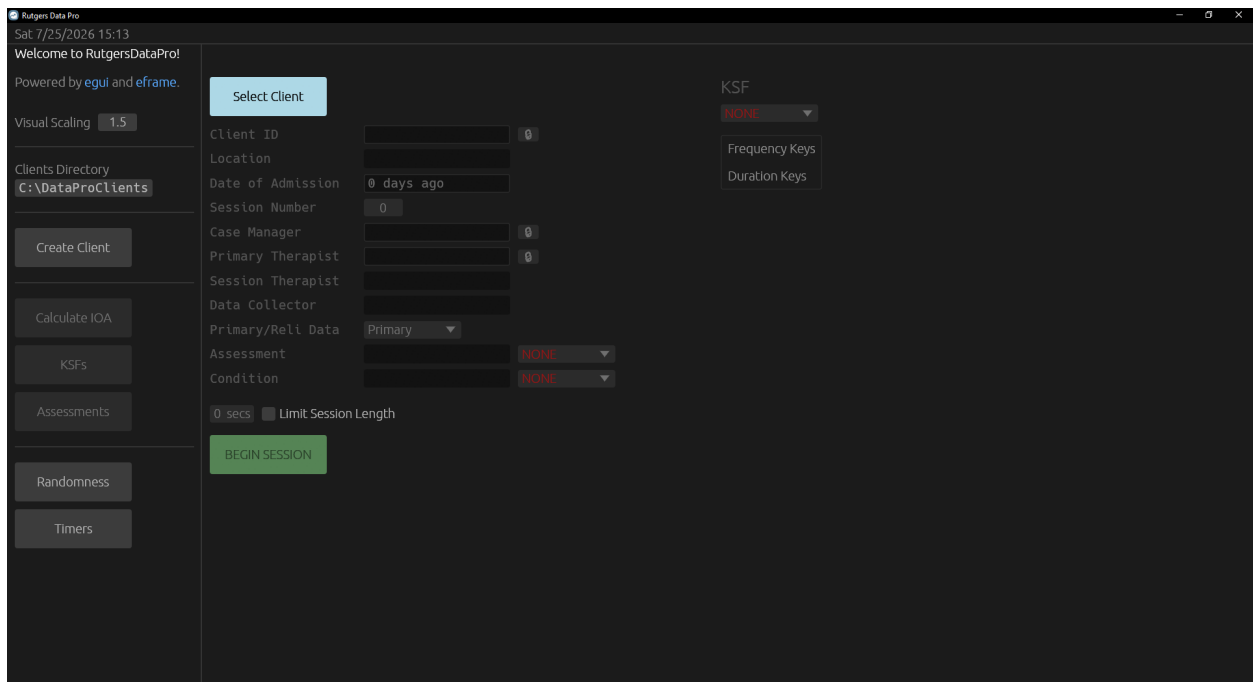

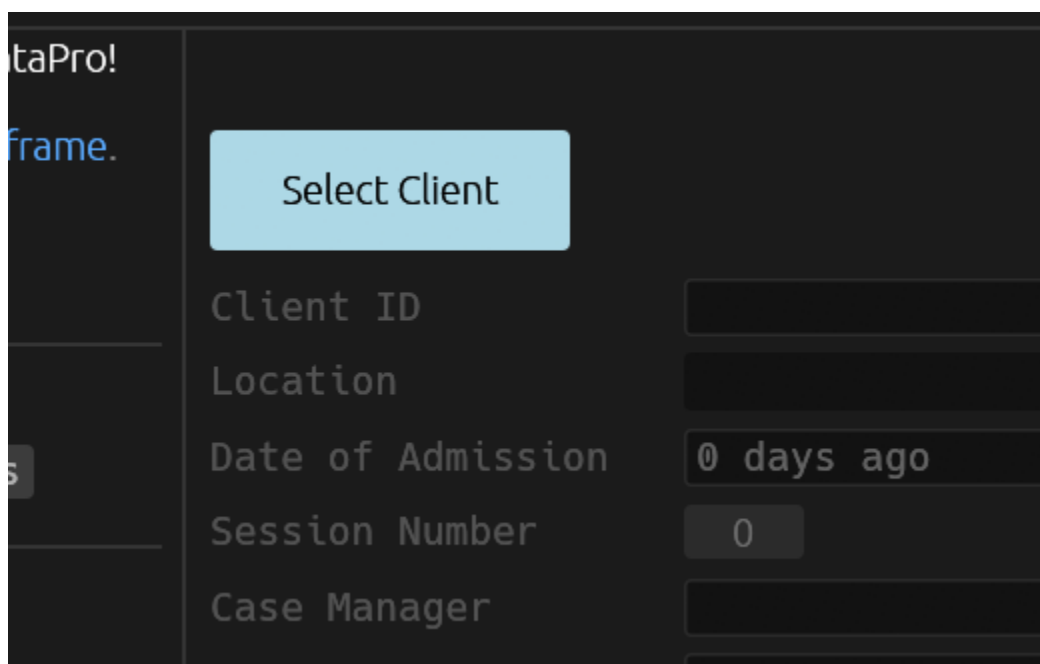

Figure 1: What you see immediately after start up.

Begin by clicking on the blue Select Client button.

The image shows a dark-themed user interface for a 'Select Client' form. A light blue button labeled 'Select Client' is at the top. Below it are several input fields with labels: 'Client ID', 'Location', 'Date of Admission', 'Session Number', and 'Case Manager'. The 'Date of Admission' field shows '0 days ago' and the 'Session Number' field shows '0'. The left sidebar contains the text 'taPro!' and 'frame.'.
